NIFTY'S BEAR CODE

NON-DISCLOSURE, CONFIDENTIALITY & INTELLECTUAL PROPERTY AGREEMENT

This Agreement is between Sagarchaudhary.com, of L@vnya's, Chopta, Rudraprayag - 246419, email lavnyainvest@gmail.com ("Publisher"), and the purchaser or authorised recipient identified in the order record, electronic acceptance form or signature section ("Recipient"). It governs access to NIFTY'S BEAR CODE by Sagar Chaudhary (the "Book") and any expressly identified restricted research materials supplied with it.

1. Purpose and Scope

The Publisher grants the Recipient access to the Book and, if separately supplied, non-public research for personal educational and research use. In return, the Recipient agrees to safeguard genuinely confidential material and respect the Publisher's applicable intellectual-property rights. This Agreement does not make publicly released information confidential merely by calling it proprietary.

2. What Is Protected

"Copyright Material" means original text, charts, illustrations, commentary, layout and qualifying original compilations to the extent protected by law. "Confidential Information" means unpublished source spreadsheets, non-public date-to-code mappings, internal screening criteria, calculation settings, unreleased research notes, restricted supplements and other non-public material identified as confidential or reasonably understood to be supplied in confidence. The Book describes 664 prospective Nifty bearish watch dates for November 2026–December 2030, with 1292 signal records and forty-six research codes; those counts are not evidence of future crashes.

3. Recipient's Confidentiality Duties

The Recipient shall use Confidential Information only for private study, independent analysis and lawful personal trading research; protect it with reasonable care; and not disclose, sell, post, upload or circulate it to unauthorised persons. Restricted datasets and files must not be shared using public cloud links, open repositories, messaging groups or paid research services without the Publisher's written permission, except where a lawful exception applies.

4. Copying, Publication and Commercial Misuse

Unless permitted by law or separately licensed in writing, the Recipient shall not:

- Reproduce or distribute substantial portions of Copyright Material.
- Sell unauthorised digital or printed copies.
- Commercially republish protected charts or written material.
- Use Confidential Information to distribute a paid calendar, dataset, course, signal service or other research product.

This is not a blanket prohibition on independently producing research, teaching general principles, trading or carrying on a lawful profession.

5. Permitted Uses and Exclusions

The Recipient may read, annotate and study the Book; keep personal records; independently calculate market dates; perform backtests; apply general knowledge to trading; write lawful reviews; make uses permitted by copyright exceptions; and consult professional advisers subject to suitable confidentiality duties. Confidential Information excludes material that:

a. Is publicly available without the Recipient's breach.
b. Was lawfully known beforehand without restriction.
c. Was independently developed without using the confidential material.
d. Was lawfully obtained from a third party entitled to disclose it.
e. Was released with the Publisher's written approval.

Disclosure required by law, court or regulator is permitted; where lawful and practicable, advance notice should be given.

6. Ownership and Limits

Ownership of applicable copyrights and confidential rights remains with their lawful owner. Purchase is not an assignment of copyright or a commercial republication licence. The Agreement claims no exclusive ownership of individual dates, public market prices, facts, general ideas, mathematical methods or astronomical phenomena, and does not override lawful transfer rights in a legitimately purchased physical book or mandatory statutory rights.

7. Security, Incidents and Restricted Access

For restricted digital files, the Recipient shall keep access credentials reasonably secure and avoid exposing the material to unauthorised people. Any known material unauthorised disclosure under the Recipient's control should be reported promptly to the Publisher at lavnyainvest@gmail.com and reasonably contained. If restricted access is lawfully terminated following a material breach, unauthorised confidential copies should be returned or deleted on reasonable request, except legally required records or other legally protected retention.

8. Term

These confidentiality obligations continue for five (5) years after the last disclosure of the relevant Confidential Information, but only while that information remains confidential. Information qualifying for continuing legal protection as confidential information or a trade secret remains protected while it lawfully has that status. Copyright protection lasts for the applicable statutory period; the exclusions in Clause 5 always apply.

9. Remedies for Breach

For an established or threatened material breach, the Publisher may seek lawful relief from a competent court, potentially including an injunction, damages and other legally available remedies. There is no automatic penalty or fixed compensation amount. Relief depends on applicable law and evidence; no provision removes mandatory consumer protections or liability for fraud.

10. Market Research and No Guarantee

The Book presents research hypotheses and conditional watch dates, not guaranteed market declines, verified predictive accuracy, investment advice or assured profits. Trading Nifty futures, options or other leveraged instruments may cause substantial loss. Readers remain responsible for independent analysis, price confirmation and their own lawful financial decisions.

11. Personal Data and Acceptance Records

The Publisher may retain reasonably necessary purchaser or acceptance details, including name, email, order reference, Agreement version and submission time, in accordance with applicable data-protection law and a published privacy notice. The complete Agreement must be available before acceptance. An affirmative, unticked-by-default "I agree" checkbox with an identifiable response record may evidence electronic acceptance, but is not automatically a certified digital signature or conclusive proof of identity.

12. Governing Law, Disputes and General Terms

Indian law governs this Agreement. The parties will first attempt a good-faith written resolution within 15 days of notice; unresolved disputes may be taken to a competent court or statutory forum. Venue: [Rudra Prayag, Uttarakhand, INDIA], only where lawful. Invalid provisions are severable; material changes require legally valid acceptance. Nothing prevents lawful criticism, reporting to regulators, independent research or exercise of non-waivable rights.

RECIPIENT ACCEPTANCE

I confirm that the complete Agreement was provided to me before acceptance, that I have read and agree to its lawful terms and exceptions, and that I understand the Book does not promise profitable trades or market crashes.
